Experience

IT Intern at Viore.Digital, Digital full-service Agency

Internship project : Yesthak | Technology : Laravel

Jan 2024 - Feb 2024

- Developed a web application called Yesthak to facilitate financial collaboration in Tunisia. The platform allows users to create profiles, establish money pots, and support causes. Using Laravel and Livewire, I built secure authentication features and dynamic user interfaces. Administrators manage categories and pots, ensuring platform integrity (**Grade : 16/20**).

Mini project : To-Do List | Technology : Laravel

- Developed a multi-user to-do list application using Laravel, featuring authentication, full CRUD functionality, and task completion status. Used Livewire for dynamic task steps management.

Internship project : L-Etagère | Technology : WordPress

Jan 2023 - Feb 2023

- Engaged in my first-year internship in Front-end web development, I created several local websites for training purposes and collaborated on launching a customized website based on a client request (**Grade : 19/20**).

Education

Licence in Information Technology - Specialty: Information systems development (DSI)

2022-2025

Higher Institute of Technological Studies of Nabeul

- Relevant courses: Java, PHP, Python/Django, Angular, Spring boot, Flutter, Android, SQL DB/DBMS, Machine Learning, DevOps.

Baccalaureate specialized in Sciences

2021-2022

High School, Borj Cedria

Academic Projects

MovieClub project | Android

Grade : 18.5/20

- Collaborated on a group project to develop an android application using Java and Firebase, integrating the TMDB API for movie and series data. Features included user authentication, personalized profiles, search, watchlists, and trailer viewing. Designed a user-friendly interface for browsing popular content and managing personal preferences.

Travel agency mini project | JAVA

Grade : 18/20

- Collaborated on a group project to develop an online reservation system for a travel agency using Java. Managed hotel and airline partnerships, client data, and both individual and group bookings. Created a user-friendly interface with Scene Builder for booking stays or flights, availability checks, and feedback submission.

CRUD mini project | PHP

- Developed a PHP CRUD application with XAMPP, handling front and back end, with distinct admin/user interfaces, secure admin authentication, and efficient database storage.

Certifications

Développez Full Stack avec Spring Boot 3 et Angular upd 2024 Udemy — Completed on November 25, 2024 Duration: 26.5 hours

Skills

- Programming Languages:** C, JavaScript, TypeScript, Java/Spring boot, Python/Django, SQL (MySQL/Oracle)
- Web development:** PHP, HTML/CSS, Angular (REST API), WordPress, Laravel, Flutter
- Database Management:** DBMS, Oracle/SQLDeveloper
- Software Skills:** MS (VScode, Excel, Word, PowerPoint), Eclipse, Figma, Power BI, Selenium, Postman, Scene Builder
- Operating Systems:** Windows, Linux/Ubuntu
- Server Environments:** XAMPP, WAMP

Personal Skills

Teamwork / Critical thinking / Communication / Organized

Languages

Arabic / English / French / German
